<b>Web Services:</b>	AWS, Heroku
<b>APIs:</b>	RESTful APIs
<b>Operating Systems:</b>	Mac OS, Windows, iOS

## Education & Certifications

<b>Bachelor degree: Information Technology</b>	<b>2023</b>
Technical University of Liberec   Czech Republic	
<ul style="list-style-type: none"><li>• Specialized in the development of application systems, with a focus on programming and practical application</li><li>• Studied a rigorous curriculum in mathematics, strengthening analytical and problem-solving skills applicable to programming and application development</li><li>• Focused coursework on desktop application development, acquiring skills in designing and implementing software solutions for desktop environments</li><li>• Applied theoretical knowledge in real-world scenarios through hands-on projects and assignments, gaining practical experience in software development</li><li>• Participated in a collaborative learning environment, working on group projects and collaborating with peers to enhance teamwork and communication skills</li></ul>	
<b>Diploma: Computer Science</b>	<b>2018</b>
Moscow Technical College of Informatics and Computer Engineering   Moscow	

- Recognized as the best student in the course, demonstrating exceptional dedication, aptitude, and achievement in computer science studies
- Graduated as the top student in the computer science program with consistently excellent marks across all subjects
- Successfully balanced academic commitments with professional responsibilities as a software developer during the entire course
- Developed a desktop application for student management, contributing to the efficient tracking and management of student records
- Took a lead role in the design and development of the desktop application, showcasing strong problem-solving and programming skills
- Collaborated with academic staff to understand specific requirements and ensure the application met the institution's needs

## Work Experience

### Web Developer

2021 - 2023

4TRANS FACTORING | Czech Republic, Prague

- Served as a full stack developer with a primary focus on backend development, contributing to the creation of an information system for employees
- Managed a database with more than 8 million records, demonstrating proficiency in database administration and optimization
- Contributed to the transition from an initial tech stack, which included JavaScript, VueJS and PHP, to a more resilient stack featuring Docker and Symfony 6, ReactJS
- Migrated storage files to AWS S3 bucket, enhancing data storage capabilities and overall system performance
- Solved complex technical challenges, ensuring the system met high standards of functionality, security, and user experience
- Collaborated with cross-functional teams to deliver projects on time and meet client

## Certifications & Awards

Symfony 6 Framework Hands-On: Udemy Certificate

April 2022

Docker - Full course: Udemy Certificate

July 2022

The Complete Web development Bootcamp: Udemy Certificate

August 2021
